

Website Evaluation

Criteria

Does it pass?

Who?

Who wrote this article? Who created the site?

Does the website have information about the author(s) / creator?

Y/N

What?

Does the site contain information you need for your research?

For example, general research should come from informational sites or organizations and not from blogs or opinions.

Y/N

When?

Is there a date the website was created or updated?

Is the information outdated? Is the date important for the type of research you are doing? (ie: health information)

Y/N

Where?

Look at the "About Us" or "Terms of Use" links.

Where does the information come from?

What does the site say about the information they provide? Organization? Encyclopedia?

Y/N

Why?

Is the website created to inform its audience?

What is the purpose of this site? Informational? Blog?

Does it try to sway the opinions of the audience?

Does the information contain bias?

Y/N
